Challenges | SMB hybrid solutions | Enable people | Enhance workspaces | Empower IT | Next steps

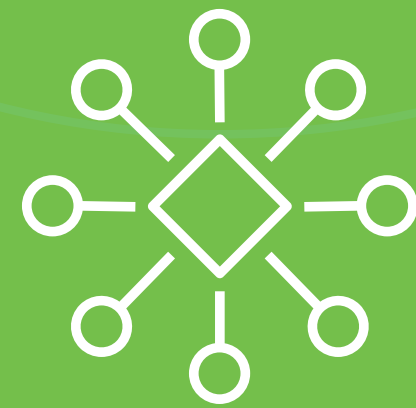

Successful hybrid SMB workplaces require secure, cloud-based solutions

- Zero-trust, identity-based access with full IT dashboard visibility
- Centralized, cloud-based security policy
- Sophisticated threat detection and vulnerability management
- Adaptable, secure collaboration tools that seamlessly transition to any context

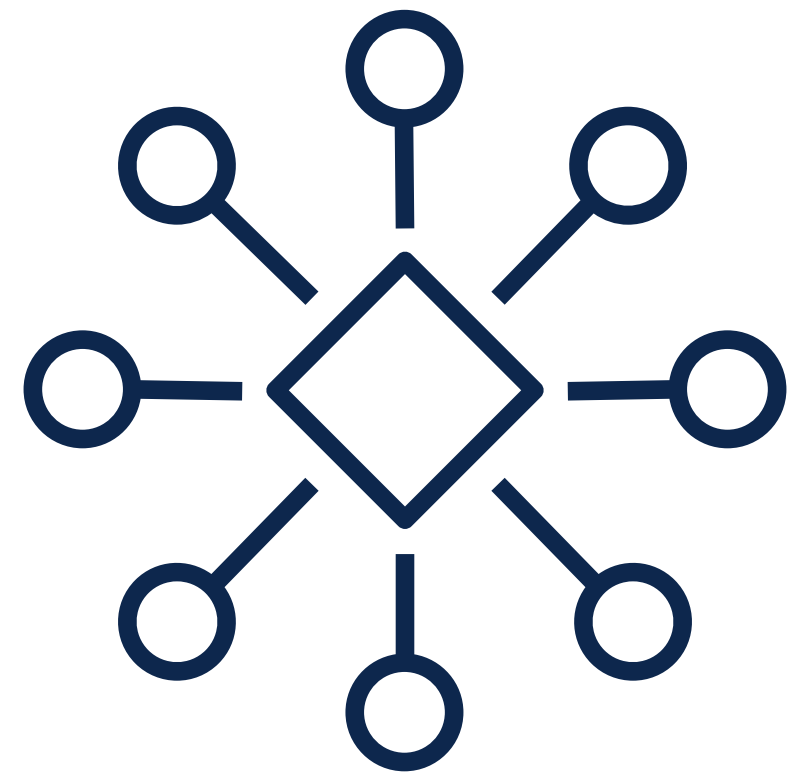

Cisco keeps your people, devices, and assets secure and connected anywhere. Minimize downtime and disruption with flexible solutions that seamlessly transition between in-office and remote environments.

Our affordable solutions enable your people to deliver great results with industry-leading, cloud-based tools that support hybrid work.

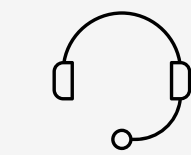

Seamless, secure collaboration in every setting

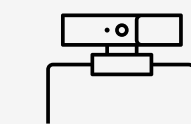

- **Uplevel your team's collaboration** with secure calling, emailing, meeting, messaging, events, webinars, and more.
- **Integrate selected products** that fit with your existing communication system, or revamp your team's collaboration with the full Webex suite.
- **Enable secure face-to-face communication** onsite or remotely with Cisco's desk cameras and headsets.
- **Give your people secure access** and protect against phishing, malware, and ransomware attacks with the combined power of Duo and Umbrella.
- **Minimize productivity disruptions** and give remote workers access to your SMB's network with Cisco Secure Client.

workspaces.

Powerful, secure hybrid workspaces

- **Proactively identify threats** with remote switch configuration built for secure operations anywhere.
- **Add and monitor secure, cloud-managed networks** with Meraki wireless access points.
- **Supercharge workplace collaboration** with IP phones, boards, room kits, and more from the Webex suite and Cisco room devices.
- **Enable your SMB to stay resilient** with built-in threat detection and response capabilities.
- **Integrate Cisco products** with your existing workspace tools for smoother logins, faster DNS lookups, and significant reduction in client configuration problems.
